

Michael Phelps

Senior Golang Developer - AWS & Microservices

Hinesville, GA 31313

(650) 646-5257

phelpsm1990@gmail.com

SKILLS

- **Programming Languages:** Golang, Python, JavaScript
- **Frameworks:** gRPC, RESTful APIs, Microservices
- **Cloud & DevOps:** AWS (Lambda, EC2, RDS, S3), Terraform, GitHub Actions, Docker, Kubernetes (EKS), CloudFormation
- **Databases:** PostgreSQL, MongoDB, DynamoDB
- **Monitoring & Observability:** Prometheus, Grafana, Amazon CloudWatch
- **Testing & QA:** TDD, BDD, Unit Testing
- **Security:** OAuth2, JWT, API Security
- **Development Methodologies:** Agile, Scrum, Continuous Integration/Continuous Deployment (CI/CD)
- **Professional Skills:** Technical troubleshooting, Root cause analysis, Team collaboration, Mentorship

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER - *Verizon Wireless*

2020 - Present

- Architected scalable microservices using Golang and AWS Lambda, enhancing system throughput by 45%.
- Implemented CI/CD pipelines with GitHub Actions and Terraform, reducing deployment times from hours to under 30 minutes.
- Designed and maintained RESTful APIs and gRPC services, improving integration efficiency with third-party systems by 50%.
- Led architecture discussions, contributing to a cloud-native design that increased system reliability and reduced downtime by 30%.
- Utilized Prometheus and Grafana for comprehensive system performance monitoring, enabling proactive issue resolution and reducing incident response time by 40%.
- Mentored junior developers on best practices in microservices architecture and cloud deployment, fostering a culture of continuous improvement.
- Executed root cause analysis for production issues, implementing solutions that improved system stability and user experience.
- Collaborated in an Agile environment, participating in sprint planning and retrospectives to enhance team productivity and project outcomes.

SOFTWARE ENGINEER - *Verizon Wireless*

2014 - 2020

- Developed backend systems using Go, significantly improving response times and user satisfaction metrics.
- Automated deployment processes with Docker and Kubernetes, streamlining operations and reducing manual errors.

- Integrated with AWS services like S3 and RDS, optimizing data storage solutions and enhancing application performance.
- Contributed to the design of a microservices architecture, which facilitated better scalability and maintainability of applications.
- Participated in code reviews and design sessions, ensuring adherence to coding standards and best practices.

EDUCATION

Bachelor's Degree, Bellevue University
